In workplace environments that have a potential risk of exposure to certain hazardous chemicals and substances, OSHA recommends or requires a “medical surveillance” program to monitor conditions that may pose potential adverse health effects. Through its affiliations with nationally certified laboratory associations, CDS provides comprehensive Blood Testing and Biological Monitoring services that satisfy the employer’s responsibility to comply with OSHA mandated medical surveillance requirements.

CDS’ Blood Testing and Biological Monitoring services include a wide array of tests for detecting potentially hazardous chemicals and substances.

- Lead
- Zinc protoporphyrin
- Cadmium
- Aromatic Solvents
- Chemical Pesticides
- And more...!

For additional information on how Blood Testing services administered by CDS can assist your organization, please contact CDS’ professional staff at (800) 439-1454 or by e-mail at info@cdsonsite.com.
