CDS' internally developed, proprietary and secure on-line database, Substance Abuse Testing Information System (SATIS), allows employers and unions 24/7 access to critical employee eligibility status information. With SATIS, you can easily check the eligibility status of current or prospective employees, obtain random selections and periodic renewals, view a list of all your employees working for you, and more.....all with a click of a mouse. SATIS is the most functional, real-time, robust on-line database system in the industry. None of our competitors give you such a secure and accessible database system like SATIS. This secure, on-line database (SATIS) is a powerful resource tool for both employers and unions.

The benefits of SATIS include:

- Security Protection guaranteed by unique access codes and passwords
- Allows for 24/7 real time access
- Efficient Administration of unique independent and national drug testing programs
- Eligibility Status of Union Members is quickly viewable by Union Administrators so they can quickly dispatch members to employers. Employers can easily view the eligibility status of all current and prospective employees within the Program(s) they are signatory to
 - Seamless mobility of employees between employers and job sites eliminating the lost time and wages associated with the duplication of drug testing
 - Random selections and periodic renewal notifications are fully computer generated
 - Random selections are available for viewing on-line giving employers a higher level of security, confidentiality and responsiveness
 - Clinical Location Listings for over 15,000 CDS collection sites throughout United States and Canada with links to Google Maps to obtain the location and driving directions.

For additional information on how CDS can help your organization design, establish and maintain a successful, compliant and cost-effective drug testing program for your organization, please contact a CDS professional staff member at (800) 439-1454. or by e-mail at info@cdsone-site.com
